Overdose Prevention  
Treatment & Recovery Resources

**FOR MORE INFO, CALL OR TEXT (509) 978-9337  
OR EMAIL [RONDA@ROOMONE.ORG](mailto:RONDA@ROOMONE.ORG)**

## WHY IS THIS PROGRAM SO IMPORTANT?

Three decades of research has shown that syringe exchange programs (SEPs) are safe, effective, and benefit entire communities by:

- Reducing the spread of infections like HIV & hepatitis
- Supporting recovery--new SEP users are 5x more likely to enter treatment and 3x more likely to stop using drugs
- Saving lives by providing naloxone (Narcan) to prevent opioid overdoses
- Protecting public safety by ensuring the safe disposal of used needles
